MP20 Firmware Release Notes

Release Date：   2023.12.15

MP20 Firmware Version：   MP20_V01.00.00.26

Supported Products and Firmware Version：

What has been updated?

1. Fixed the issue where the last song could not be deleted.

2. Added TTS character limit of approximately 440 characters, resolving the problem of abnormal playback with long texts.

3. Implemented media status monitoring, automatically restarting media after playback issues to resolve the problem of requiring a restart to function properly.

4. Optimized version announcement.

Fix the issue

1. Long text playback for English, French, Italian, Russian, Latvian, Spanish, and other languages is incomplete.

2. If the playback is not normal on the first attempt, subsequent playback of other TTS also fails to play properly, requiring a restart to enable normal TTS playback.
